## **DATA ON PHYSICS ENROLLMENTS AND DEGREES**

### **A SUPPLEMENT**

The detailed data from the annual survey of Enrollments and Degrees are presented in this supplement. The 1992-93 physics degrees and the 1993-94 physics enrollments are listed for each of the 747 physics degree-granting departments at colleges and universities in the United States.

The data shown for the institutions are listed alphabetically by state. The enrollment data consists of annual introductory physics courses, the junior and senior physics majors, total number of graduate physics students and the foreign and first year graduate students included in that total. Presented in the right hand column are the physics degrees granted at all levels. Data on undergraduates who are in their fifth or more year of undergraduate study are reported when supplied by the department. Fields with the data omitted are cases where the department does not have students in that category or did not supply us with the information.

Notations used in this supplement:

- \* Department grants master's degree as its highest degree. Some degree recipients in this category may continue physics graduate study at another institution (N=79).
- \*\* Department grants a doctorate as its highest physics degree (N=183).
- e Department did not contribute to this year's survey. Figures presented for these institutions are estimates based on data supplied by that institution in an earlier year.
- 1 Department has no undergraduate program in physics (N=7).
- MASTR Is used to indicate masters degrees from masters departments or masters degree recipients who have left a doctorate department.
- MASTR Is used to indicate a masters enroute to a physics Phd at a  
ENR doctorate-granting department.
